

Exponential Cover Page; What I know and can do

Question	First Day	Last Day
What is a geometric sequence?		$(a_0 \cdot r^k)_{k=0}^{\infty}$ $a_{k+1} = r \cdot a_k$ <p style="text-align: right; color: red;">↖ previous term</p> ordered list
What is a series?		a sum of a sequence $\sum a_k$
Is the following equal or not? $\sum_{k=1}^n (a_k + 1) = 1 + \sum_{k=1}^n a_k$ (reasoning)		$\sum (a_k + 1) = a_{1+1} + a_{2+1} + \dots + a_{n+1}$ $= n + (a_1 + \dots + a_n)$ $\neq 1 + \sum a_k$
What is Euler's number?		$e = 2.71828... \notin \mathbb{Q}$ e^x is inverse of $\ln x$ * slope + value + area all same
Sketch $f(x) = -2 \frac{x-1}{5} + 1$ $= -1 \cdot 2 \frac{x-1}{5} + 1$ (communicating)		

Question	First Day	Last Day
What is a logarithm?		$\log_b x = ? \Rightarrow b^? = x$ <p>inverse of an exponential</p>
Solve for x $2e^{-0.1(x+1)} + 3 = 4$ (solving)		$x = -10 \ln\left(\frac{4-3}{2}\right) - 1$ $= 10 \ln 2 - 1$ $\approx 5.93 \dots$
What are the log laws analogous to?		<p>★ The exponent laws just swap inside + outside operations</p> $\log(n \cdot m) = \log n + \log m$ $e^{(n \cdot m)} = (e^n)^m$
Solve for x $\log x - 2 \ln x = 1$ (reasoning)		$\log x - \frac{\log x^2}{\log e} = 1$ $\log x - \log x \frac{2}{\log e} = 1$ $\log x^{1 - \frac{2}{\log e}} = 1$ $x = 10^{\frac{1}{1 - \frac{2}{\log e}}}$
